ROSEN GROUP WINS OCENSA'S AWARD FOR TECHNOLOGICAL INNOVATION IN INTEGRITY MANAGEMENT

BOGOTA, Colombia, November 3, 2023 – For the second time, OCENSA, the hydrocarbon transporter with the most extensive linear infrastructure in Colombia, has awarded ROSEN Group in the Technology and Innovation category at the Supply Award 2023.

This prestigious award highlights ROSEN's outstanding contribution to the implementation of innovative technologies for pipeline integrity management. The innovation presented by ROSEN specifically addresses the identification of circumferential cracks in pipelines caused by external factors, such as underwater currents and ground movement. This solution has emerged in response to the need to manage threats to the integrity of OCENSA's hydrocarbon transportation system.

For over two decades, OCENSA has relied on ROSEN as its strategic partner in integrity. Throughout this collaboration, both companies have worked on various projects ensuring the safe and efficient operation of the pipeline.

Leonardo Mendoza, ROSEN South America's Director of Execution, emphasized the strategic vision behind implementing crack detection technology using angular ultrasound: "This technology was incorporated into instrumented tools for in-line inspection, developing a customized bidirectional design that considers the unique characteristics of OCENSA's underwater pipeline.

"This has been possible thanks to our innovative culture that constantly challenges us to think outside the box, develop our technical expertise, and understand the needs of our clients and the market. Thank you, OCENSA, for this recognition of the entire ROSEN team."

The recognized innovation has had a positive impact on OCENSA by reducing costs, improving defect detection, maintaining cost-effectiveness and contributing to the protection of the environment as well as of people.

OCENSA's goal with the Supply Award 2023: On this occasion, OCENSA recognizes and celebrates the outstanding contribution of its allies to sustainability, value generation with stakeholders and organizational adaptation.

Alexánder Cadena, OCENSA's CEO and Leonardo Mendoza, ROSEN South America's Director of Execution

About the ROSEN Group

The ROSEN Group is a globally leading provider of cutting-edge solutions in all areas of the integrity process chain. Since its origins as a one-man business in 1981, ROSEN has rapidly grown and continues to do so. Today, the business is still privately owned and consists of a team of more than 4,000 employees operating in more than 120 countries.

ROSEN's products and services:

- Inspection of critical industrial assets to ensure reliable operations of the highest standards and effectiveness
- Customized engineering consultancy providing efficient asset integrity management
- Production and supply of customized novel products and systems
- Market-driven, topical, state-of-the-art research and development yielding "added-value" products and services
