ROSEN GROUP SUCCESSFULLY ACHIEVED ISO/IEC 27001:2022 CERTIFICATION –
A MILESTONE FOR INFORMATION SECURITY AND OPERATIONAL EXCELLENCE

Stans, Switzerland, February 2025 – ROSEN Group, a leading asset integrity management company delivering solutions for all areas of the integrity process chain of industrial assets, is proud to announce being officially ISO/IEC 27001:2022 certified.

ISO/IEC 27001:2022 is an internationally recognized standard for Information Security Management Systems (ISMS). The certification covers specific business processes as well as the hosting infrastructure of the asset integrity management software "NIMA" for displaying, visualizing, and evaluating inspection data, such as integrity assessments or risk analyses. Furthermore, it allows repair planning and regulatory response definition. With NIMA, information is transformed into knowledge, which in turn enables smarter decision-making.

The company has set up and implemented a holistic security management framework to minimize the risk of data breaches and loss, protecting the confidentiality, integrity, and availability of information within its operations, as cyber security failures can cause missing or inaccurate safety information and pipeline records, leading to tragic accidents.

The certification is granted on behalf of the ROSEN Technology and Research Center GmbH, and includes further ROSEN locations in Australia and the USA. The benefits are as follows:

1. **Enhanced Security and Trust:** Customers can rest assured that a comprehensive framework for information security is implemented that is aligned with global best practices.
2. **Comprehensive Risk Management:** The certification demonstrates the ability to anticipate, identify, and mitigate information security risks effectively.
3. **Regulatory Compliance**: The ISO/IEC 27001:2022 certification distinguishes a trusted partner for customers operating in heavily regulated industries.

ROSEN collects object data from its customers' industrial assets using advanced sensor technologies and inspection systems to provide insight into their condition and performance. Data management of industrial assets is particularly important to detect and effectively respond to integrity threats. With the ISO/IEC 27001:2022 certification, ROSEN will continually demonstrate that it can meet highest standards to remain a secure and trustworthy partner for its customers.
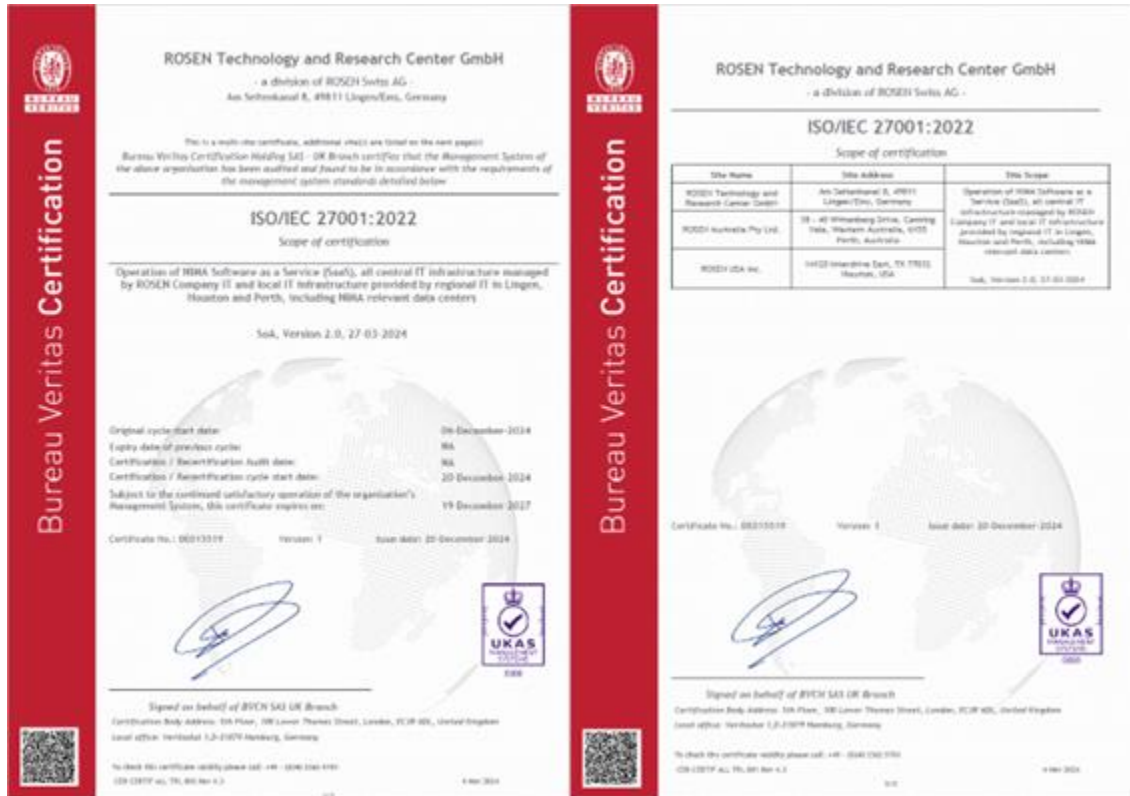

ISO/IEC 27001:2022 Certificate of the ROSEN Group

About the ROSEN Group

The ROSEN Group is a leading global provider of cutting-edge solutions in all areas of the integrity process chain. Since its beginnings as a one-man business in 1981, ROSEN has grown rapidly and is today a technology group that operates in more than 110 countries with over 4,000 highly qualified employees.

ROSEN's products and services:
- Inspection of critical industrial assets to ensure reliable operations of the highest standards and effectiveness
- Customized engineering consultancy providing efficient asset integrity management
- Production and supply of customized novel products and systems
- Market-driven, topical state-of-the-art research and development providing "added-value" products and services
